Experiment No.6

Q Create a responsive web page using the Bootstrap framework.

The page should:

- **Display three images arranged in a grid layout ,Display text content below each image**
- **Use Bootstrap's grid system (row and column classes).**
- **Include a styled table showing student information.**
- **Ensure the page is responsive on different screen sizes.**

index.html-

```
<!DOCTYPE html>

<html lang="en">

<head>

   <meta charset="UTF-8">

</body>
</html>
```

OUTPUT-

Responsive Web Page using the Bootstrap framework.

Web Development

Web development is the process of creating websites and web applications. It includes designing the user interface using HTML, CSS, JavaScript (frontend) and building the server, database, and logic using technologies like Python, Java, or Node.js (backend)

Data Science

Data science is the field of analyzing data to extract useful insights. It involves statistics, programming (mainly Python), data visualization, and machine learning to make predictions and support decision-making.

Cloud Computing

Cloud computing is the delivery of computing services like storage, servers, and databases over the internet instead of using local computers. Platforms like AWS, Azure, and Google Cloud allow businesses to run applications and store data online in a scalable way.

Student Information

Roll No	Name	Branch	Year
501	Prathamesh	Data Science	Second Year
502	Rahul	Data Science	Second Year
503	Raj	Data Science	Second Year
